Summary

Software Engineer with 2.5+ years of experience building and supporting scalable backend applications, RESTful APIs, and microservices. Proficient in Java, Spring Boot, SQL, and Git, with hands-on experience in API development, performance optimization, production support, and Agile delivery.

Technical Skills

- **Languages:** Java, JavaScript, SQL
- **Backend:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, REST APIs, Microservices, Kafka
- **Frontend:** React.js, Redux, Tailwind CSS
- **Databases:** MySQL, MongoDB
- **Tools & DevOps:** Git, GitHub, Jenkins, Postman, SonarQube, Docker, Kubernetes, Maven, Elasticsearch, AWS
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, Computer Networks, Operating Systems, Multithreading, Concurrency, Low-Level Design

Experience

Packaged App Development Analyst, Accenture – Pune July 2026 – Present

- Developed and enhanced Java/Spring Boot backend services and RESTful APIs for plan and investment data retrieval, including multi-plan data integration across enterprise systems.
- Analyzed complex business requirements and backend workflows, identifying validation gaps and implementing scalable solutions aligned with business requirements.
- Optimized Plan Delay Distribution validation logic by eliminating redundant checks, **improving processing efficiency by 20%** and reducing unnecessary delays in withdrawal processing.
- Collaborated with business analysts, QA, and cross-functional teams to troubleshoot production issues, clarify business rules, validate fixes, and **deliver sprint commitments** in an Agile environment.
- **Tech Stack:** Java, Spring Boot, REST APIs, JSON, Git, SonarQube, Agile/Scrum

Associate Software Engineer, Tech Mahindra – Pune Dec 2023 – June 2026

- Worked on enterprise-scale telecom platforms for Telefónica Germany, developing and supporting high-availability Spring Boot microservices integrated with BSS/OSS systems in a production environment.
- Engineered robust and **scalable RESTful APIs** using Java and Spring Boot for authentication, payments, and order workflows, resulting in a 15% reduction in average API response time.
- Enhanced system performance by automating **CI/CD pipelines** (GitHub Actions/Jenkins) and **optimizing SQL queries** with proper indexing, achieving 40% faster deployments and 25% faster data fetch time.

Projects

WearIt — Fashion E-commerce Platform

- Developed a responsive fashion e-commerce platform supporting product discovery, filtering, and category-based recommendations across 100+ products.
- Built RESTful backend services to manage users, products, and recommendations with efficient data handling.
- Secured application access using JWT-based authentication with protected routes and role-based authorization.
- **Tech Stack:** React.js, Node.js, Express.js, MongoDB, JWT, REST APIs

Education

Galgotia College of Engineering and Technology

Aug 2019 – Jun 2023

B.Tech in Electronics and Instrumentation, GPA: 8.23/10.0; Ranked 7th in AKTU

Certifications & Achievements

- AWS Cloud Practitioner (July 2025)
- **Pat on the Back Award**, Tech Mahindra — Recognition for performance and ownership.
- Solved 500+ Data Structures and Algorithms problems across platforms including LeetCode, CodeChef and GeeksforGeeks
